Independent, hardworking, and familiar with principles of MCU software development. High ranked at various regional programming competitions. Can quickly conduct researches and process information.

Details

Place of birth	Donetsk	Date of birth	10th June 2003

Employment History

Intern(on a voluntary basis) at RECON DNIPRO, Dnipro

2018 — 2021

Implemented software communication module for cellular USB-modem on modified real-time distro of debian for single-boarded computer.

Main goal of this project was accessing user interface of emergency event recorder for 35-110 kV distribution networks, from distant PC.

At this time my project is exploited at Territorial Defense Forces roadblock near Obukhiv, Kyivska oblast' and Topol substation of electric distribution network(110 kV) in Dnipro, Dnipropetrovska oblast.
